

Mark Vergnano Addressed American Chemical Society CME Forum

The Chemours Company CEO Discussed “Chemours and Our Industry: Shaping the Future”

NEW YORK CITY, N.Y., Sept. 9, 2015 – Mark Vergnano, President and CEO, The Chemours Company, today addressed industry leaders on how the chemicals industry can be more poised than ever to meet evolving market demands, customer needs and shareholder imperatives.

Addressing the Chemical Marketing and Economics (CME) group of the American Chemical Society’s New York Section, Vergnano described the industry dynamics surrounding Chemours’ recent launch as an independent company and how the company is navigating those currents, while bringing great chemistry to a changing world.

Speaking to a sold-out audience at the Penn Club of New York, Vergnano discussed three macro trends impacting the industry: demographics and the rapidly growing global population, the changing workforce, and the shift from mass production to mass customization—and what this period of change means for Chemours and its industry peers.

“At Chemours, we’re embracing this idea of positive change and have begun the hard work of transforming ourselves into a higher value chemistry company,” said Vergnano. “As a collection of companies and advocacy groups and industry organizations, we cannot live and thrive in a vacuum. We have an obligation to ourselves and to the world to adapt to the changes around us—shifting demographics, workforces and business expectations—and lead change. When we are seen as a change-leading industry, then we begin to garner the attention and appreciation of the world that simply could not exist as it does without us.”

“We were thrilled to have Mark address our members as CEO of Chemours,” said George Rodriguez, CME Chair. “It was a unique opportunity to hear the forces and strategies that will shape the exciting future of one of the leading players in the performance chemicals market, as well as our industry as a whole.”

“It was an honor to speak at this distinguished forum of the largest scientific society in the world,” concluded Vergnano. “Our industry does great things and we make progress possible. Chemours is focusing its energies on becoming the kind of company that both responds to the changing needs of the world and leads change. Together our industry can do the same, and it will mean a better future for all of us and for the world.”

About The Chemours Company

The Chemours Company (NYSE: CC) helps create a colorful, capable and cleaner world through the power of chemistry. Chemours is a global leader in titanium technologies, fluoroproducts and chemical solutions, providing its customers with solutions in a wide range of industries with market-defining products, application expertise and chemistry-based innovations. Chemours ingredients are found in plastics and coatings, refrigeration and air conditioning, mining and oil refining operations and general industrial manufacturing.
